[2] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[3] Full high-definition (FHD) content required to view FHD images.

[5] Eye Contact, Background Blur, and Automatic Framing are Windows Studio Effects features that require Windows 11 OS and a processor equipped with an NPU. AI features may require software purchase, subscription, or enablement by a software platform provider, or may have specific configuration or compatibility requirements. Performance varies by use, configuration, and other factors.
